DISPLAY OF MARITIME VESSELS AT CUSTOMS WHARF

Friday, 24/11/2023, 10:00 - 16:00

Saturday, 25/11/2023, 10:00 - 16:00

Sunday, 26/11/2023, 10:00 - 16:00

OB-04 Croatian Kostajnica, a patrol ship from the fleet of the Croatian navy, was built in 1985 in the Kraljeвица shipyard. Like many other Yugoslav navy ships, at the beginning of the war, this ship found itself in the Šibenik Repair Shipyard, in the final phase of a major overhaul. Shipyard workers took it over on 26 September 1991, and on 28 September, it was launched into the sea. It was named Croatian Kostajnica on 15 October 1991, in memory of the defenders of the town of the same name. Until the end of the homeland war, the ship was used to support the operations of the Croatian armed forces and to secure maritime traffic. After the end of the war, it was part of the Croatian navy fleet and was responsible for monitoring the state borders at sea. With the reorganisation of the Croatian navy in 2007/2008 it was transferred to the Croatian coast guard fleet.

P-212 patrol vessel of the Ministry of the Interior, class B. The vessel was built in the Pula shipyard Tehnomont in 2013. It is 13.85m long and 4.35m wide. It is equipped with two engines of 373kW each, and reaches a speed of 30 knots. It has a three member crew.

Fisheries inspection's speedboat Periska is inflatable boat with solid bottom, 14.95m in length. It can develop a speed of 40 knots and has an autonomy of 250nm. It is one of two identical vessels used by fisheries inspectors of the Fisheries Control Service throughout the year, in all weather conditions.

Tartana is a wooden ship built in 1927 in the Italian shipyard Viareggio. It is owned by the Molaj cimur association from Pula, which bought and restored it, using entirely original materials (there is no stainless steel, plastic or nylon on it). It is 20m long, 4.5m wide and has 2m draft, and the Association plans is to use it for sail transport.

A schooner type of sailboat Nerezinac was built under the name Dražica. It got a new name after the renovation modeled on the design of the Lošinj sailboats from the 19th century. It belongs to Apoxyomena Museum in Mali Lošinj, and is used to showcase and explain the rich maritime tradition of the island of Lošinj.

Motor-sailer Morena is a tourist boat 35m long. It was built in 2008, and is used for tours along the coast of Istria, and also across Kvarner bay towards the islands of Cres and Lošinj. It has 36 cabins with bathrooms and can accommodate up to 36 passengers.

Presentations of underwater robots and drones

Friday, 24/11/2023, 15:00 - 16:00 Dive-IT presentation of underwater robots and mobile technologies for use in scientific research, education, inspection of vessels and piers, aquaculture, archeology and underwater filming.

Saturday, 25/11/2023, 15:00 - 16:00 Dive-IT presentation of underwater robots and mobile technologies for use in scientific research, education, inspection of vessels and piers, aquaculture, archeology and underwater filming.

Sunday, 26/11/2023, 10:30 - 13:00 Presentation by the Maritime University - how an underwater drone works.
